Security Management, Planning and Asset Protection with Integrated Security Solutions

INTRODUCTION

- Envisioned Security leaders armed with the necessary professional skills and knowledge are the only way to create value added departments. As quickly as the world and technology develops, so do the security risks and threats. Some companies make the gross error of viewing their security departments and employees as lower level functions. However, a good culture of Security will enhance definition of what the Security discipline is all about and explains the value and cost benefit analysis it will bring to the organisation.
- So, in order to achieve this consistent level of best practice this training seminar is structured to equip delegates with the specialist security knowledge to perform their management and supervisory duties to international standards in Security Planning, Asset Protection and Integrated Security Projects.

OBJECTIVES

At the end of this training seminar, delegates should understand the principals of:

- Identifying the importance and components of an integrated security system
- Identifying and effectively operate access control systems
- Planning and implementing CCTV system
- Identifying the use of Perimeter Protection Systems
- Planning security projects and implementing these effectively
- Creating a programme to protect intellectual property and physical assets
- Running a pro-active professional and dynamic security team

TRAINING METHODOLOGY

- The delegates will be involved in the latest trends in seminar presentations. The classroom presentations are made up of interactive practical exercises, supported by audio visual material and case studies. Delegates will be expected to participate actively in relating the principles of security management to the specific needs for their industry.
-

ORGANISATIONAL IMPACT

By sending delegates to this training seminar organisations will:

- Gain an understanding of the strong business reasons why organisations should effectively manage and plan to protect their human, physical and cyber resources
- Lead to improvements in their organisation's professional reputation, standard operating procedures and the ability to continue to function effectively and successfully in the face of today's many threats

PERSONAL IMPACT

Delegates attending this training seminar will:

- Gain an improved personal knowledge of threats and risks to their organisation
- Learn new leadership skills to combat these threats and how to implement standards, plans and strategies which will increase their professional reputation
- Improve their ability to deal with any serious security issues
