

# **Risk Assessments, Method Statements and Quality Plans**

## INTRODUCTION

- This Risk Assessments, Method Statements and Quality Plans training seminar introduces the principles of carrying out competent risk assessments, preparing method statements and developing client / contractor project quality plans. An effective risk and project safety management programme is widely accepted as an essential component in the control of client projects and their contractor's competency and risk management procedures.
- Preventing major incidents is about ensuring that both client and contractor personnel, regardless of position, comply with client / contractor project risk control procedures, safe working practices and quality plans.

### This training seminar will highlight:

- Impact of an Effective Client / Contractor Project Risk and Safety Management Programme
- Importance of establishing Effective Quality Plans for Roles, Responsibilities and Authority
- Carrying out Competent Risk Assessments and Analysis of Project Tasks and Activities
- How to implement a step-by-step client / contractor risk and safety management programme?
- Preparation of risk-based methods statements for hazardous and high risk work

## **OBJECTIVES**
