Building Collaborative Business Models for Innovation and Competitiveness

INTRODUCTION

- This Building Collaborative Business Models for Innovation and Competitiveness training course will demonstrate how business model innovation is enabling new approaches to complex investment projects that require collaborative strategies. Achieving competitive advantage through collaboration involves systematic efforts to align management and employees with customers, suppliers, investors and other stakeholders. This multi-stakeholder approach requires robust definitions of the value proposition of each vendor and partner, rather than classical strategic aims and objectives.
- Business models are modern tools that enable managers to develop comprehensive scenarios for product, service and market development, to establish the foundations for achieving increased and sustainable return on investment. This training course will offer a thorough, practical introduction to business model innovation and related topics including knowledge management and creative thinking with extended practice of business model development for managers and executives.

PROGRAMME OBJECTIVES

- Enable delegates to acquire knowledge and skills for business model innovation
- Enlighten participants about good practice in stakeholder engagement for innovation and competitiveness
- Develop frameworks for building collaborative advantage
- Complement management skills with advanced business development techniques

WHO SHOULD ATTEND?

- Business Leaders and Innovation Managers interested in enhancing their business development skills
 - Innovation Leaders and Senior Managers who are tasked with delivering profitable growth to their organisation
 - Executives and Public Administrators tasked with strategic development programmes, institutional development, policy development and strategy implementation for more and better innovation
 - Members of policy groups tasked with strategic planning, innovation program development and financing
 - Members of government responsible for designing open innovation ecosystems and open innovation tasks, or for implementing innovation strategy
 - Leaders of academic institutions, universities, and other knowledge providers
-

TRAINING METHODOLOGY

- This training course is designed as an intensive knowledge sharing and practice experience, with a set of short focussed lectures and practical group work on practice exercises that are then applied to carefully selected case studies. Delegates will be introduced to advanced knowledge of business models and business model innovation, the transition from competitive to collaborative advantage, and how to manage strategic development programmes. Participants will learn by active participation, discussions, on-line resources and video materials.

PROGRAMME SUMMARY

- The main goal of this training course is to provide participants with an intensive five-day training experience and exposure to the best practice in business model innovation.
- The key competences built through this training are to develop a comprehensive picture of the drivers of business success, to evaluate the potential in new value propositions and to develop strategic pathways for business development. Business model innovation is introduced as a concept and as practice, building on existing knowledge and skills.

PROGRAM OUTLINE

What Do We Know About Business Models

- Introduction to business models
- The relationship between a business model and strategy
