Innovations in Leadership

INTRODUCTION

- It's difficult to find anyone who disagrees with the notion that leadership at every level of today's organisation is a critical success factor. COVID-19 has introduced new way of working that will be with us forever. The introduction of Artificial Intelligence will significantly change the way we work.
- But how is this achieved? The introduction of Artificial Intelligence will start the demise of the manager and will see the dramatic rise of the dynamic talented leaders. We know that there are only a few great leaders and that leadership skills are very special. This training course on Innovation in Leadership will provide you with the critical processes needed to be an effective modern leader in any organisation, in either the Public or Private sector. This is a unique opportunity for you to really master the latest techniques and processes that will make a difference. You can use these powerful techniques for yourself or for showing others. This is a very practical training course.

This training course on Innovations in Leadership will highlight:

- Master new research on how to use the critical leadership competencies
- Regardless of your current skill level this course will make a big difference to you
- Take away from this course usable processes to use yourself or when developing others
- You will get information based on the latest proven research
- You will be able to use two self-analysis tools unique to this course

OBJECTIVES

- Complete their own self-analysis to show their existing preferred style and have a plan for development
 - Know the best way to balance work to get the best from others using a proven process using a self-diagnostic tool
