

Leadership and Organisational Development in Healthcare

INTRODUCTION

- This training course addresses the development of leaders in healthcare by exploring
 the global context of healthcare including innovations in technology and practice. The
 training course is run in workshop format to encourage sharing of ideas and good
 practice. The training course offers delegates the opportunity to evaluate different ways
 that organisations conduct leadership development and to construct personal
 development plans for future ongoing development.
- The training course will address the global context of healthcare management, for instance the impact of the global Covid-19 pandemic on organisations, communities, clinicians, and non-clinicians in developed and developing countries. Many different leadership styles and approaches will be covered including personal effectiveness, management of resources and management of people. There will be opportunities to practice new skills for resilience and conflict management. Through self-assessment, delegates will gain understanding of their current preferences and development needs.

This training course will highlight:

- An introduction to organisational development
- Current opportunities and challenges in global delivery of healthcare
- The importance of leadership in health care provision
- The impact of the Covid-19 pandemic and preparing for the future
- Competency frameworks and models

OBJECTIVES

By the end of this training seminar, you will be able to:

- Understand approaches to organisation development
- Explore multiple leadership theories and styles
- Build your confidence and self-awareness
- Gain perspectives on current healthcare management opportunities and challenges
- Develop skills in conflict management and resilience

TRAINING METHODOLOGY

This training course utilizes a range of proven adult learning techniques to ensure
maximum understanding, comprehension and retention of the information presented.
These include discussions, case studies, presentations and exercises. The course
leader will make extensive use of real-life case examples of organisations with which
they have been personally involved. Each session provides opportunities to develop
skills using case experience and apply them to your organisation creating more
confident and resilient leaders.

ORGANISATIONAL IMPACT

What will your organisation gain from employees attending this training course?

- · More confident and effective leaders
- Understanding of key healthcare opportunities and challenges
- How to create an environment which encourages innovation
- · Confidence in applying different leadership styles
- More effective teamwork
- Better provision of care

PERSONAL IMPACT

Participants gain a wider perspective on global healthcare whilst also becoming more resilient leaders:

- A broader understanding of different leadership styles
- Greater self-awareness to enhance their leadership capabilities
- More resilience to deal with challenging and potentially conflicting situations
- A wider perspective of global healthcare opportunities and challenges
- Greater recognition of the impact of leadership on quality of healthcare delivery
- Greater confidence and ability in leading teams and employees

WHO SHOULD ATTEND?

This training course is suitable to a wide range of professionals but will especially benefit:

- Managers and clinicians jointly responsible for leading healthcare organisations
- Managers and clinicians responsible for quality care provision
- Line and functional managers, team leaders and supervisors
- Managers and leaders new to leadership roles
- Managers and leaders wanting to further enhance their leadership capabilities
