Strategic Thinking & Decision Making in Competitive Environments

INTRODUCTION

- Today's business is done in an increasingly competitive and fast-changing environment. Product life-cycles are shortening; technology is changing rapidly; markets are opening globally. Companies now need to think faster, develop quicker and often change radically if they are to achieve profitable growth and create tomorrow's organisation out of today's organisation.
- This highly interactive training course on Strategic Thinking & Decision Making in Competitive Environments has been developed for experienced management team members who now need to step up and take new opportunities and at the same time deal with new threats from existing and emerging competitors.

Participants attending the Strategic Thinking & Decision Making in Competitive Environments training course will develop the following specific competencies:

- Business Value Analysis
- Customer Analysis
- Project Choice
- Project Management and Control
- Change and Development

PROGRAMME OBJECTIVES

Strategic Thinking & Decision Making in Competitive Environments training course aims to help participants to achieve the following objectives:

- Gain an understanding of the workings of competitive markets
 - Identify the right tools and techniques to use in market analysis
 - Build an effective system for acquiring and processing competitor information
 - Understand the processes and the strategic significance of value migration
 - Manage simultaneous competitive / collaborative business relationships
 - Create sustainable differentiation on the basis of the total business model
-

WHO SHOULD ATTEND?

The Strategic Thinking & Decision Making in Competitive Environments training course is suitable for a very wide range of professionals involved in private and public sector organisations and their activities, but it will be particularly beneficial to:

- Strategic Planners
- Top-level Operations Personnel
- Marketing Analysts
- Technical and Research Professionals
- Specialists in Corporate Finance
- Human Resource Team who contribute to long-term Staff Development

TRAINING METHODOLOGY

- The Strategic Thinking & Decision Making in Competitive Environments training course will combine presentations with instructor-guided interactive discussions between participating delegates that relate to their individual interests.
- In addition practical exercises, video material and case studies will stimulate and support these discussions in order to provide maximum benefit to the participants. Above all, the course leader will make extensive use of case examples and case studies based on real-life strategic issues and situations in which he has been personally involved.
